Today businesses operate in an unprecedentedly fluid environment. Every company operating in multiple countries needs a local trusted partner for executing projects. Qatar Masters is one such time tested and trusted business partner of many Multi-National Companies operating in Qatar.

Established in 2007, Qatar Masters is now a leading entity in the construction industry of Qatar for MEP contracting, Automation & ELV Systems. We have partnered with more than 20 Multi-National Companies to execute many high profile construction projects in Qatar. Our passionate managers go beyond being a traditional vendor and develop long term professional relationship with every client. This is the prime reason why our clients have chosen us as their vendor in successive projects from a long time.

- FIFA Stadiums
- Doha Airbase
- Al Baker Hotel
- Qatar Rail

# MEP Contracting

## Electrical works

**Engineering, Procurement and Construction of MV-LV Electrification system, namely:**

- Medium Voltage Panels.
- Final Distribution Boards and Sub Main Panels.
- Feeder & Tap off Bus Bars Risers.
- Internal & External Light Fittings.
- Wiring, Cabling, Accessories.
- M.I.C.C / Fire resistant cabling works.
- Installation of Switching devices and Control Panels.

**Plumbing & Drainage works in Commercial & Residential Buildings, namely:**

- Installation of Sanitary Wares & Fittings.
- Water supply & Drainage Piping Works.
- Installation of Central Water Heater.
- Installation of Floor Drain Trap, Gully Trap & Rain Water Outlets.
- Waste Soil & Sewage Piping Works.
- Manholes & Accessories.

## Plumbing works

## HVAC Works

**Air conditioning work for large and medium-size facilities:**

- Window, Split & Ducted Air conditioning System.
- Duct Insulation & Fabrications.
- AHU, FCU and VRF Multi-Split Systems.
- Chilled water/condenser water piping work.
- Installation of Kitchen hood & Exhaust system.
- Installation of Ventilation system for Car Parking & Basement.
- HVAC Testing and Balancing Services.

**Fire fighting/ suppression solutions for building protection:**

- FM 200 Systems.
- Sprinkler Systems & Fire Hydrant System.
- Kitchen-hood and Industrial Suppression System.
- Rising Mains Systems, Hose Reels and Fire Equipment cabinets.
- Installation of Extinguishers, Foam Equipment, Fire Pumps and Water Tanks.

## Fire Fighting Works

## Sector

- High Rise Buildings • Airports • Factories • Substations
- Convention Centers • TV Studios • Sport Stadiums
- Railways • Commercial Buildings

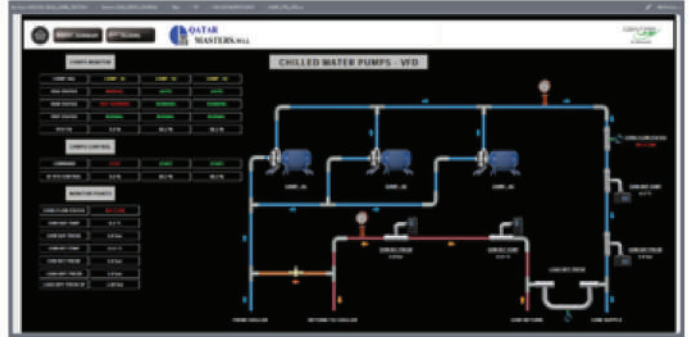

# ELV Systems

Qatar Masters W.L.L can offer the following products and solutions to suit various requirements for following systems ranging from High Performance type to Standard and Economical range:

- Building Management System
- Room Pressure Monitoring system
- Healthcare & Laboratory Airflow Control System
- Lighting Control system
- Networking & Structure Cabling Solutions
- Access Control System
- CCTV & security Surveillance
- Public Addressing system
- Home Automation system
- Maintenance services for ELV systems & Onsite Support
- Trading of HVAC Equipment

# Building Management Systems

## What is BMS?

BMS systems are "Intelligent" microprocessor based controller networks installed to monitor and control a buildings technical systems and services such as air conditioning, ventilation, lighting and hydraulics.

## What We Offer:

### Supervision & Energy Management

- ARENA NX
- ENERGY VISION NX
- MOBILE VIEW

### Integration & HVAC Plant Control

- HAWK 8000 DDC Controllers
- EAGLEHAWK DDC Controllers
- EAGLE DDC Controllers

### Room Management

- MERLIN NX SMALL & LARGE CONTROLLERS
- LYNX SMALL & LARGE CONTROLLERS

## Benefits:

Proposed CentraLine BMS system is now based on open communications protocols and are WEB enabled allowing integration of systems from multiple system vendors and access from anywhere in the world.

# Room Pressure Monitoring System

## What is Room Pressure Monitoring System?

The Room Pressure Monitor is designed specifically to meet the needs by measuring and monitoring the pressure of a space with reference to other space and is applicable in Compounding Pharmacies, Isolation Rooms, Operating Rooms & Laboratory areas.

## What we Offer:

- Most accurate and stable measurement at Low Pressures monitors
- Venturi valves
- Dampers
- Actuators
- VAV boxes, including accepting a measurement from a flow grid
- Pitot-based flow stations to monitor ACH
- Thermal, linear-based flow stations
- Door switches to avoid nuisance alarms when doors open
- Occupancy sensors
- Key switches (to switch rooms from All Rooms to Normal Patient rooms)
- Temperature sensors
- Relative Humidity sensors
- Pressure transducers

## Benefits:

Multiple parameters can be monitored from a single point.  
Audible and visual alarm to alert the staff of the changes in parameters.  
Seamless integration with any brand of Building Management System.

# Healthcare & Laboratory Airflow Control System

## Airflow Control Device for Critical Environments

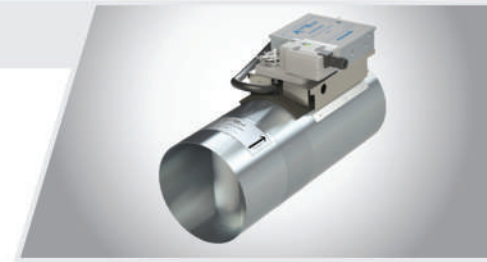

### What is Air Flow Control System?

The Accuvalve is an electronically operated airflow control valve for critical environments wherein airborne particulates, contaminants, and pollutants are kept within strict limits. The Accuvalve is designed for latest sustainable building control incorporating high accuracy airflow sensing with a revolutionary design based upon proven vortex technologies.

### What we Offer:

#### Accuvalve Airflow Control Valves

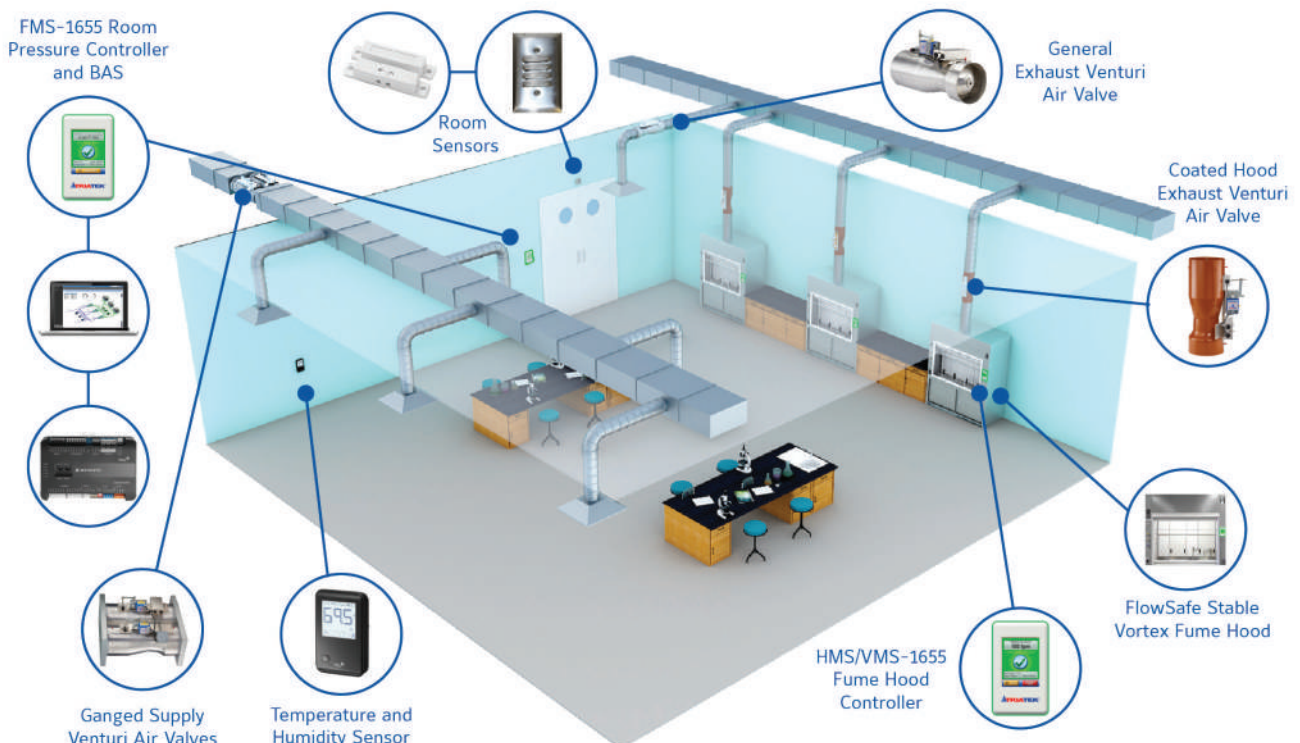

- 6000 Series
- 4000 Series
- 2000 Series

### Benefits:

Proposed healthcare & laboratory airflow control system has innumerable advantages listed below:

- Low Pressure Drop with Low Noise
- No Inlet or Outlet Conditions (No Straight Run required), Not Position Sensitive
- Universal to all BAS Systems
- Fast Speed of response < 1 second
- Precise " True " Airflow Measurement
- High Accuracy
- Low Maintenance

# Access Control Systems

## What is Access Control System?

Access control systems are designed primarily to grant access to an individual or a group to a building/premises or a single office or area only to those who have been authorized to access them.

Previously, the only way to control access was with a deadbolt lock and a good key, but our needs have changed, and we now focus on smarter solutions. We want to be able to monitor everyone who enters a door or turnstile as well as integrate anti-intrusion devices and automate entire facilities.

## What we Offer:

SiPass integrated is a powerful and extremely flexible access control system that enables you to manage access to anything from a single low-rise office with just a few doors to massive high-rise complexes with tens of thousands of doors, gates, barriers and elevators.

## Benefits:

The access control system we offer can be seamlessly integrated with other security systems such as CCTV and the Intelligent Fire Detection System to provide you with the most comprehensive and reliable security solution possible. You can rest assured that security is monitored at all times and that all staff members are protected from intruders throughout the entire facility with our Access Control System.

# CCTV and Security Surveillance

## What is CCTV System?

CCTV stands for Closed-Circuit Television.

The term "Closed-circuit television" refers to the video footage being viewed via a limited number of monitors from strategically placed cameras inside a building and/or outside.

Therefore, CCTV systems are made up of all the components and aspects that make up the entire system, such as cameras, monitors, cabling i.e., network infrastructure, video storage, and video management.

## What we Offer:

We do the integration and deployment of digital video surveillance systems running on IP-based networks to help improve your security programs with surveillance solution that is specific to your business purpose.

We provide vast range of CCTV cameras and equipment, including IP cameras, HD analog cameras, management and analytics software, alarm systems, and many other assistive surveillance equipment.

## Benefits:

IP cameras are the future of surveillance cameras, turning received images and audio input into data that can be transmitted over a secure internet connection.

- Variety of Choice to the end users on a range of features.
- Easy to use
- Expandable
- Improved resolutions
- Simple installation

# Public Addressing System (PA System)

## What is PA System?

The primary purpose of a Public Address system is to provide clear and audible speech to listeners spread across an area, prerecorded music, or message.

When designing a commercial sound system, the process includes considering many nuanced design criteria; including, the size or volume of the space, noise levels, how many people will be listening, and where those listeners are located.

## What We Offer:

The PA systems we provide are cost-effective and capable of addressing large numbers of people for a very long time without any worry about damage or replacements.

Advanced technology and an easy installation process make our Public Address systems easy to install, maintain, and train for anyone.

## Benefits:

What good is a message if no one can hear it? Countless benefits can be enjoyed by installing PA system and integrating with video surveillance, fire alarms, digital signs and more...

- Low Maintenance
- Retrofitting
- Integration
- Location
- Frequent testing
- Simple installation

# Home Automation Systems

## What is Home Automation System?

It's an automated home that allows you to control home appliances such as fans, cooling & heating systems, music system and more just with a tap on your smartphone.

A home automation system can involve switching off electrical appliances when the home is unoccupied, then switching on again when occupied.

## What We Offer:

Our Solutions use smart technology to detect presence or absence and control air conditioning, lighting, and other in-room systems. If a room is unoccupied and all non-essential services are turned off, the system automatically switches to energy-saving mode. After detecting presence, air conditioning, lighting, and other services are reactivated at their previous settings, ensuring comfort and conserving energy.

## Benefits:

Smart homes' are one of the relatively newest trends around the globe. Home automation is capable of reducing negative impacts on the environment. Being so efficient, it helps to turn off electrical appliances when they are not in use, carefully monitors leaks and controls consumption, it can reduce the carbon footprint that we produce on a day-to-day basis.

- Energy Savings
- Secure a house
- Send Alerts
- Remotely Switch On/Off from any place

# Lighting Control System

## What is Lighting Control System?

Energy efficiency is one of the main focuses of research in electrical engineering at the present time.

Automatic lighting control systems reduce energy consumption by decreasing operating time of lights based on various factors like occupancy, time of day, availability of daylight etc.

## What we Offer:

Besides selling Lighting products, lighting systems, and providing Lighting solutions as requested by customers, the Division offers technical assistance to contractors/Clients.

Modern lighting controls typically include a switch or dimmer controlling a single light or group of lights. Even though this historic standard is effective, it is cumbersome compared to lighting control systems, especially in large spaces.

## Benefits:

Lighting control systems can provide significant energy savings and result in reduction in electricity costs. Decrease in electricity demand also has a positive environmental impact resulting from reduced carbon footprint.

- Energy Savings
- Multiple Scene Setting
- Aesthetics and Design
- Remotely Switch On/Off from any place
- Extra convenience
- An Added Layer of Security

# Structured Cabling Solutions

## Copper & Fiber Optic Networks

### What is Structured Cabling?

A structured cabling system is the wiring network that carries all your communications systems, including unified communications, VoIP, data, voice, multimedia, security, PoE, and even wireless, throughout your office, building, or campus.

### What We Offer:

Qatar Masters experts in providing well-designed, carefully implemented structured cabling systems that meet your data and communications needs.

We specialized in the installation of copper network cabling to ensure long term performance, system integrity, and investment protection. We are experienced in carrying out major Fiber Optic network installations with all the detailed planning and resource utilization required for such projects.

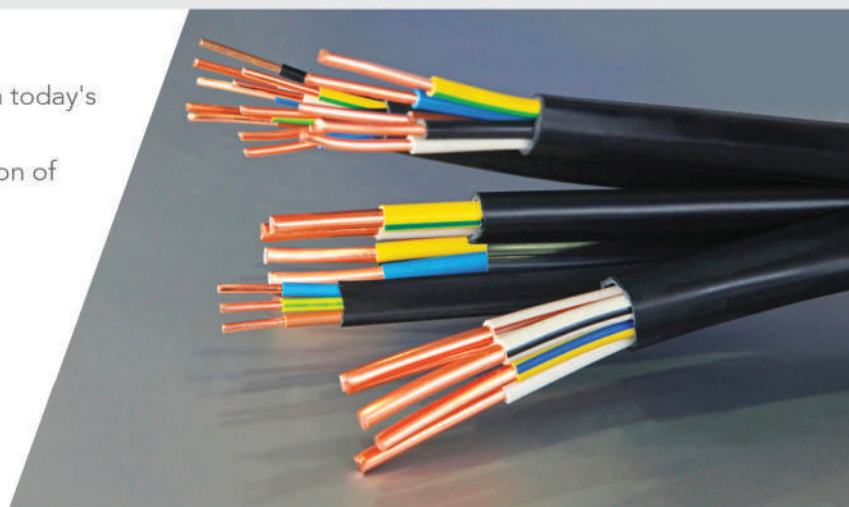

### Benefits:

Businesses across the globe are increasingly putting computer data, applications etc. on their networks in today's fast-paced work environments.

While structural cabling accounts for a modest fraction of your entire network investment, it can account for approximately 80% of network efficiency.

It's a foundation upon which any company is built.

- Organized way of Cabling
- Reduces Cabling Bulk & Congestion
- Supports Future Upgrades
- Easier To Manage The Network

# Trading

We specialize in trading of materials used in Heating, Ventilation & Air-conditioning (HVAC) System.

## Our Products

- Fresh Air Louvers
- Disc Valves
- Volume Control Dampers
- Fire Dampers
- Variable Air Volume
- Grilles
- Registers
- Linear Diffusers
- Ceiling Diffusers
- Jet Diffusers
- Swirl Diffusers
- Round Ceiling Diffusers
- Linear Slot Diffusers
- Sand Trap Louvers
- CAV
- Pressure Relief Dampers
- Sound Attenuators
- Acoustic Louvers
- Non Return Dampers.

# Absolute providers:

As part of Qatar Masters' commitment to providing reliable solutions to clients, it has adopted high quality products from well-known companies that provide flexible, state-of-the-art software and hardware as well as providing equipment's.

- Building Management System (Bms)
- Controllers, Modules, Intrgrated Software
- Control Valve, Thermostat, Valve & Damper Actuator, Sensors

- Air Valves (High Speed) – Accu-valve Is Accutrol's Innovative Airflow Control Device, The First Airflow Control Valve Designed for Use In Critical Environments and the First to be Recognized for Its Significant Value Impact.

# Work Force Solutions

With an in-depth understanding of the local labor market and extensive resource pool, Qatar Master provides assistance to our clients to build cost effective workforce for their projects in Qatar. Our workforce solutions machinery is time tested by many Multi-National Companies. Hence, time and again they have chosen us as their partner for many projects in Qatar.

## For Employers

## Our Services

- Talent hiring.
- Contract staffing support.
- Mobilization & Relocation.
- PRO Services.

## Support Skill Set

- English speaking staff dedicated to attend your enquiry 24x7.
- Full-fledged office in Doha city to support your entire work force requirements.
- Qualified technical team to understand your exact project requirement.
- Welfare Officers with good knowledge about Qatar Supreme Committee Standards and Labor Laws.
- Wide channel of association with recruitment agencies in multiple countries.
- Experienced PRO team to assist in Visa processing and relocation documentation.
- Award winning workers accommodations.
